8 classical electrodynamics you can take away the summation sign ( $\sum$ ) without changing the meaning of the expression Therefore, you can write  $\sum_i A_i B_i = \sum_i A_i B_i$  (12) Here the repeated index  $i$  is called the "dummy index" ( $\tilde{N}$ ), and a dummy index is implicitly summed over To generalize this convection to more general cases, we need to follow
