Information Theory and Statistical Mechanics

statistical mechanics as a form of statistical inference rather than as a physical theory, it is found that the usual computational rules, starting with the determination of the partition function, are an immediate consequence of the maximum-entropy principle In the resulting "subjective statistical mechanics," the ...

Lecture Notes on Statistical Theory1

regardless of the statistical inference problem at hand, the first step of a statistical analysis is to produce some summary of the information in the data about the unknown parameter² Such summaries are called statistics, and Section 14 gives an introduction Once a summary
